

Glossary - Proposal #1002

It would be great to have comments on terms

04/18/2012 10:51 PM - Manuel Menezes de Sequeira

Status: □□□New□	Start date:

Target version: Unplanned	
Description	
Since the glossary should reflect a common language and understanding of the domain, it would be great to be able to add comments to terms entered into the glossary. The Product Owner, clients, and other stakeholders in the project would thus have an excellent (as in close to the issue, easy to use) feedback mechanism with regard to this common understanding.

- Target version set to Unplanned

The feature is useful, I think too.
However, Implementing is difficult a little.
I will try if possible.
