Target version: x.x.x.undecided	
Description	
we have some support activities which aren't linked to specific ticket: with this plugin I don't see them...

Would you explain to a slight degree?

#2 - 05/16/2012 08:01 AM - Riccardo Rocca

During a project I have some people working on different tickets, while some consultants spend their time in other activities, regarding the whole projects, i.e. project meetings, design reviews, support to customer in using new application, writing reports and technical/user documentation. These activities not necessarily have tickets, but are recorded referred to project. With your plugins I don't see this records.
