Description I am having problems with emoticons stretching across table cells. Consider the following code: Not in table: (/) <pre> (/) In a table with a cell with text another cell (/) In a new row </pre> produces the following output: Not in table: ✓  Redmine: 2.0.2 WikiExt: 0.5.0	

History

#1 - 08/15/2012 09:37 PM - Sølve Monteiro

Apologies, the code I'm running is as follows:

```
Not in table: (/)
```

```
| (/) In a table with a cell with text|another cell|
```

(only one row)

#2 - 08/15/2012 09:56 PM - Sølve Monteiro

I just found out this was actually a problem with the theme I was using ([a1](#)): In the stylesheet applications.css, line 438 I commented out

```
.wiki table img {
    width: 100%;
```

}

And now it looks as expected.
