

Wiki Extensions - Defect #1284

Problem due to interaction with Wiki Template plugin

09/26/2013 07:33 AM - Stéphane Briand

Status:	Resolved	Start date:	09/26/2013
Priority:	Normal	Due date:	
Assignee:	Haru Iida	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	0.6.5	Spent time:	0.00 hour

Description

What steps will reproduce the problem?

Install the plugin [Wiki template](#)

Activate *wiki extension* module, as well as *wiki template* module.

Edit a wiki page.

Error page appears.

What is the expected output? What do you see instead?

Should be able to select a wiki template, and edit the wiki page content.

Please give us a result of following command.

```
% ruby script/about
```

Environment:

```
Redmine version      2.3.3.devel
Ruby version          1.9.3-p392 (2013-02-22) [i386-mingw32]
Rails version         3.2.13
Environment           production
Database adapter      MySQL2
```

SCM:

```
Git                   1.8.1
Filesystem
```

Redmine plugins:

```
redmine_gsc_plantillas 0.1.0
redmine_issue_checklist 2.0.5
redmine_wiki_extensions 0.6.4
redmine_wiki_issue_fields 0.4.1
```

Please provide any additional information below.

I found a way to turn around this issue. In file *wiki_extensions_wiki_controller_patch.rb*, line 47, I changed :

```
if (args[:partial] == 'common/preview')
```

```
to
```

```
if (args.class == Hash) and (args.has_key?:partial) and (args[:partial] == 'common/preview')
```

Actually, the type of *args*, is sometime a hash, sometime a string.

Associated revisions

Revision 4434f876 - 04/19/2014 10:40 PM - Haru Iida

fixes #1284 conflict with template plugin.

History

#1 - 04/19/2014 10:38 PM - Haru lida

- Project changed from *r-labs* to *Wiki Extensions*
- Assignee set to *Haru lida*
- Target version set to *0.6.5*

Sorry for my late answer. I didn't notice this issue until now.
I will fix soon.

#2 - 04/19/2014 10:41 PM - Haru lida

- Status changed from `New` to `Resolved`
- % Done changed from `0` to `100`
