

Wiki Extensions - Defect #694

Redmine 1.1.2 changes wiki controller "index" api

03/18/2011 12:40 AM - Ted Lilley

Status: <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> New <input type="checkbox"/>	Start date: 03/18/2011
Priority: <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> Normal <input type="checkbox"/>	Due date:

Target version:	Spent time: 0.00 hour
Description Wiki extensions' tab function breaks in the latest Redmine 1.1.2. The <code>redirect_to</code> call when clicking a tab still calls the "index" action in the wiki controller, but examining the wiki controller source reveals an apparent substitution of the function "index" for a new "show" action. It looks like the rest of the code within the wiki controller has been updated to call "show" wherever it used to call "index". I'm trying to patch my 0.2.4 <code>wiki_extensions</code> to do the same and see if this fixes the tabs.	

History

#1 - 03/18/2011 12:42 AM - Ted Lilley

The function in `wiki_extensions` is in `wiki_extensions_controller.rb` under the function `forward_wiki_page`, line 55.

#2 - 03/18/2011 12:43 AM - Ted Lilley

That didn't work. Not sure what to try next.

#3 - 03/18/2011 12:50 AM - Haru lida

0.2.4 is too old.
Use 0.3.2.

<http://www.redmine.org/plugins/wikiextensions>

#4 - 03/18/2011 12:50 AM - Ted Lilley

Fixed it for the tabs. Looks like this applies to all the `redirect` calls in `wiki_extensions`. Here's the sample fix:

```
diff --git a/app/controllers/wiki_extensions_controller.rb b/app/controllers/wiki_extensions_controller.rb
--- a/app/controllers/wiki_extensions_controller.rb

Haru lida 000000:

0.2.4 is too old.
Use 0.3.2.

<http://www.redmine.org/plugins/wikiextensions>

Thanks for the pointer. If you use google to try to find the latest, you end up at the google code repository which left off at 0.2.4. This is because a google search for "redmine wiki extensions" leads you to the original plugin page, not the new plugin directory one. From there you can't tell that the repository has been moved to bitbucket.

An update to the original text of the forum post at: <http://www.redmine.org/boards/3/topics/7130> would prevent this.
