Target version: 0.3.9	Spent time: 0.00 hour
Description	
We are running Redmine Wiki Extensions 0.38 on Redmine 1.3.1.	
The macro fn ignores content after a comma in its description (which may be misinterpreted as additional parameters). Let me show an example: I want to have a comma in its description. So I may do <code>{{fn(word1, its description, deliberately with a comma)}}</code> . All content after the second comma isn't shown in the footnote list of this wiki page.	
Error executing the fn macro (undefined method `page' for #<Issue:0x00000007f89588>)
